SUMMARY

I have a deep-seated interest in technology and web development, and I've always been passionate about delving into the business aspects of the tech industry. Before transitioning to my current career, my background was in the automotive sector. My programming journey commenced with the completion of the Hactiv8 bootcamp, where I honed my skills as a full-stack web developer. This transition was driven by my lifelong passion for technology, leading me to leave behind my previous career in the automotive industry.
